EXAMINER

STULTZ, JESSICA T

ART UNIT PAPER NUMBER

2873

DATE MAILED: 09/06/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

NA

Office Action Summary	Application No. 10/800,625	Applicant(s) HU ET AL	
	Examiner Jessica T. Stultz	Art Unit 2873	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 August 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) 2-23 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 16 March 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Drawings

Figures 15-16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Election/Restrictions

Applicant's election without traverse of Group Ia, claim 1 in the reply filed on August 23, 2005 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cao in view of Lam et al.

Regarding claim 1, Cao discloses a traveling-wave electro-optic modulator (Column 5, line 33-Column 5, line 39, wherein the modulator modulates a traveling wave, Figure 1) configured to function simultaneously (Column 3, lines 1-17, wherein the modulator is the

Art Unit: 2873

synchronous optical regenerator “10”, Figure 1) as a photodetector (Column 3, lines 1-17, wherein the photo detectors are “22”, Figure 1), a demultiplexer (Column 3, lines 1-17, wherein the demultiplexer is “12”, Figure 1), and an optical pulse generator for clock-recovery and demultiplexing (Column 3, lines 1-17 and Column 4, lines 26-47, wherein the optical pulse generator is modulator “20” and the clock recovery circuit is “24”, Figure 1), but does not specifically disclose that the electro-optic modulator is an electroabsorption modulator. Lam et al teaches of a traveling-wave electroabsorption modulator (Abstract and Sections 8 and 30-34, wherein the traveling-wave electroabsorption modulator is shown in Figure 1a) used in detectors and demultiplexing systems (Sections 3, 28, and claim 19) for the purpose of providing fine tuning of the distances traveled by the optical signals within the modulator and therefore maximizing the traveling-wave effect (Sections 34-35). Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made for the traveling-wave electro-optic modulator of Cao to further be an electroabsorption modulator since Lam et al teaches of a traveling-wave electroabsorption modulator used in detector or demultiplexing systems for the purpose of providing fine tuning of the distances traveled by the optical signals within the modulator and therefore maximizing the traveling-wave effect.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lawrence, Tong, and Uchiyama et al are cited as having some similar structure since they disclose optical modulators with clock-recovery systems and photo detectors.
